PROFESSIONAL SUMMARY

Software Engineering Technology student with comprehensive knowledge of Agile/Scrum methodologies, and hands-on experience in full-stack web development.

Proficient in HTML5, CSS3, JavaScript, and React.js.

With growing expertise in Java and Python. Developed multiple projects including responsive web applications, API integrations, and database systems.

Passionate about creating efficient, user-friendly software solutions and eager to contribute to innovative development teams.

TECHNICAL SKILLS

Programming Languages:

- JavaScript (Intermediate), HTML5, CSS3
- Java (Learning - OOP, Data Structures)
- Python (Learning - Fundamentals, Scripting)
- SQL (Database Queries)

Web Development:

- React.js, Node.js, Express.js
- RESTful APIs, MongoDB, MySQL
- Responsive Design, CSS Grid, Flexbox

Software Engineering:

- Agile/Scrum Methodologies, SDLC
- Object-Oriented Programming (OOP)
- Git Version Control, Test-Driven Development
- UML Diagrams, Design Patterns

Tools & Platforms:

- VS Code, Eclipse, GitHub
- npm, Vite, Chrome DevTools

EDUCATION

Advanced Diploma in Software Engineering Technology

Centennial College, Toronto, ON,

- Expected Graduation: June 2026
- Current GPA: 3.2/4.0
- Relevant Coursework:
 - Software Engineering Principles & Patterns
 - Agile Development Methodologies
 - Database Design & Management Systems

- Web Application Development & Frameworks
- Software Testing & Quality Assurance
- Object-Oriented Programming (Java , C#)
- Database Systems & SQL

High School Diploma - Science & Technology Program

Toronto High School, Toronto, ON | Graduated: June 2022

- Honors with Distinction | Mathematics & Computer Science Focus

SOFTWARE ENGINEERING EXPERIENCE

Software Development Team Project | Centennial College

January 2024 - April 2024

- Practiced Agile methodology in a 4-person team developing a full-stack application
- Utilized Scrum framework with 2-week sprints, sprint reviews, and backlog grooming
- Implemented version control strategies using Git feature branch workflow
- Created UML diagrams for system design and documentation
- Applied object-oriented design patterns in React component architecture

SOFTWARE ENGINEERING METHODOLOGIES

Agile & Scrum:

- Experienced in Scrum ceremonies and Agile principles
- User story creation and backlog management
- Sprint planning, estimation
- Retrospectives and continuous improvement

Software Design:

- Object-Oriented Design Principles
- Design Patterns
- UML diagramming (Use Case, Class, Sequence Diagrams)

PROJECTS

Portfolio Website | HTML5, CSS3, JavaScript

- Developed a fully responsive personal portfolio website with 6 interactive pages
- Implemented mobile-first design using CSS Grid and Flexbox layouts
- Features: Navigation system, contact form, project gallery, responsive design
- Technologies: HTML5, CSS3, JavaScript, Responsive Design

Task Manager Application | JavaScript, Local Storage

- Created an interactive task management application with CRUD operations
- Implemented local storage for data persistence across browser sessions
- Features: Add/edit/delete tasks, filtering, dark/light theme toggle
- Technologies: JavaScript, DOM Manipulation, Local Storage API

Weather Dashboard | JavaScript, API Integration

- Built a weather application fetching real-time data from OpenWeather API
- Implemented geolocation services and dynamic UI updates
- Features: Current weather, 5-day forecast, city search, responsive design
- Technologies: JavaScript, Fetch API, JSON parsing

E-Commerce Product Page | HTML, CSS, JavaScript

- Designed and developed a product showcase page for an online store
- Implemented image gallery, size selection, and add-to-cart functionality
- Features: Product zoom, quantity selector, responsive product grid
- Technologies: HTML5, CSS3, JavaScript, CSS Animations

CURRENT LEARNING & SKILL DEVELOPMENT

Java Programming:

- Object-Oriented Programming concepts (Classes, Objects, Inheritance)
- Java Syntax, Data Types, Control Structures
- Exception Handling, Collections Framework
- Building console applications and simple GUI programs

Python Development:

- Python fundamentals and syntax
- Data structures (Lists, Dictionaries, Tuples)
- File handling and basic scripting
- Introduction to Python web frameworks (Flask)

Advanced Web Technologies:

- React.js components and state management
- Node.js and Express.js fundamentals
- RESTful API development
- Database integration with MongoDB

ACADEMIC PROJECTS

Student Management System | Java Console Application

- Developed a console-based student record management system
- Features: Add students, view records, calculate GPA, search functionality
- Technologies: Java, Object-Oriented Design, File I/O

Number Guessing Game | Python

- Created an interactive number guessing game with multiple difficulty levels
- Implemented score tracking and game statistics
- Technologies: Python, Random module, Conditional logic

Library Book Tracker | HTML, CSS, JavaScript

- Built a web application to track personal book collection
- Features: Add books, mark as read/unread, search and filter
- Technologies: HTML5, CSS3, JavaScript, Local Storage

CERTIFICATIONS & WORKSHOPS

- Introduction to C# - Coursera
- HTML, CSS, and JavaScript - Coursera
- Introduction to Java Programming - Coursera

TECHNICAL ABILITIES

Frontend Development:

- Creating semantic HTML structure

- CSS styling with animations and transitions
- JavaScript interactivity and DOM manipulation

Programming Fundamentals:

- Problem-solving with algorithms
- Debugging and error handling
- Code documentation and comments
- Version control with Git
- Basic data structures implementation

Software Engineering Practices:

- Requirements analysis and planning
- Modular code organization
- Testing and validation
- Project documentation
- Collaborative development

PROFESSIONAL DEVELOPMENT

Online Learning:

- Regular participation in coding challenges online
- Active member of programming communities and forums
- Continuous learning through online tutorials and documentation

Personal Projects:

- Maintaining a coding blog documenting learning journey

- Contributing to open-source documentation projects
- Building a personal project portfolio on GitHub
